PROFESSIONAL SUMMARY

Junior Java Backend Developer with a Higher Vocational Diploma in Web Application Development and hands-on experience building web applications and REST APIs using Java, Spring Boot, and PostgreSQL. Developed software for real business needs, from requirements analysis and business rules to testing and launch preparation. I have also worked with AWS deployments and am expanding my skills in serverless architectures. Seeking a backend development role where I can contribute and continue growing.

TECHNICAL SKILLS

Backend: Java 17+, Spring Boot, Spring Web, Spring Security, Spring Data JPA / Hibernate, REST APIs

Databases: SQL, PostgreSQL, MySQL, Flyway

Cloud & deployment: AWS S3, CloudFront, Route 53, ACM, API Gateway, Lambda, DynamoDB, IAM; Railway, Vercel

Frontend: React, Astro, JavaScript, TypeScript

Testing & tools: JUnit 5, Mockito, Postman, Playwright, Git, GitHub, Maven, Docker (basic), Linux (basic)

FEATURED PROJECTS

Control de Horas - Employee time tracking application | *Real client*

- Full-stack development with Java, Spring Boot, React, and PostgreSQL to manage workers, job sites, and time records.
- Implemented business rules, backend validation, access control, and functional testing; application ready for rollout.

Taller Hijos Román - Automotive workshop website | *Real client · Live*

- Built a responsive website with Astro to showcase services, simplify contact, and support local search visibility.
- Deployed to AWS with private S3, CloudFront (OAC), Route 53, and ACM/HTTPS; integrated Google Analytics and Search Console.

IssueDesk AWS - Serverless task app lab | *Technical project · In progress*

- Hands-on task application lab with a frontend hosted on S3/CloudFront and a serverless backend using API Gateway, Lambda, and DynamoDB.
- Exploring AWS service integration, data access patterns, and IAM permissions.

ADDITIONAL PROJECTS

IssueDesk (issue tracking) - Personal project with a Java/Spring Boot API, authentication, roles, and a React interface.

OrderTrack Lite - REST API for orders and inventory, tested with JUnit 5 and Mockito. | DroneCup - REST API with Spring Boot and MySQL, deployed on Railway.

EDUCATION

Higher Vocational Diploma in Web Application Development (DAW) | IES Pío Baroja | Completed June 2026
